

Instructor getting started guide

Report your adoption

- 1 Go to OpenStax.org/adoption to fill out our two-minute survey and let us know you're using OpenStax or recommending it as a resource. Your feedback will help secure funding to revise our existing books and to create new ones.

Get the book

- 2 Visit OpenStax.org/subjects and select your book. Then choose your preferred format under "Get the book." We recommend web view — our responsive design works seamlessly on any device.

Access instructor-only resources

- 3 OpenStax books come with free instructor resources, along with additional low-cost resources like online homework and adaptive courseware from our OpenStax Allies. To get access to these resources, make an instructor account at <https://accounts.OpenStax.org/signup>. Then, once you've been verified, click on "Instructor Resources" on your book page on OpenStax.org.

Make sure your text is available in your campus bookstore

- 4 Many students will look for the text in the campus bookstore. Ask your bookstore to order print copies of your OpenStax book through indiCo (formerly NACSCORP) — enough for 10% of your class enrollment — so your students have the option of purchasing a low-cost print version of their book if they prefer.

Get your students started

5

Download the Student Getting Started Guide from the “Student resources” section on your book page and send to your roster. For your syllabus, you can include our Sample Syllabus Language (located under “Instructor resources”), and provide links to assigned sections from the web view of your book.

Spread the word

6

Like us on Facebook or follow us on Twitter and help spread the word about OpenStax. We don’t have salespeople, so your recommendation is critical to our mission of getting our free, peer-reviewed, openly licensed textbooks into the hands of as many students as possible.
